EDUCATION

- **University Name** City, Country
Bachelor's Degree in Intended Major Sep. 20XX – Jun. 20XX
- **High School Name** City, Country
XX Program; GPA / Predicted Score / Academic Distinction Sep. 20XX – May 20XX

EXPERIENCE

- **University Library** City, Country
Student Data Assistant Jan. 20XX – May 20XX
 - Cleaned and organized circulation records using spreadsheets and simple scripts, improving consistency across weekly reports.
 - Created summary charts for staff to track peak borrowing periods and commonly requested materials.
- **Community Technology Program** City, Country
Volunteer Mentor Sep. 20XX – Dec. 20XX
 - Helped students build beginner programming projects and troubleshoot basic coding errors during weekly workshops.
 - Prepared short exercises on variables, loops, and functions for small-group teaching sessions.

PROJECTS

- **Campus Shuttle Delay Dashboard:**
 - Built a dashboard that summarizes historical shuttle arrival times and highlights routes with frequent delays.
 - Processed timestamped trip data and visualized delay patterns by route and time of day.
- **Sorting Algorithm Performance Study:**
 - Compared several sorting algorithms on datasets of different sizes and input patterns.
 - Measured runtime trends and analyzed how nearly sorted, random, and reverse-sorted inputs affected performance.
- **Course Task Planner:**
 - Developed a simple web application for tracking assignments, deadlines, and completion status across multiple courses.
 - Added filtering and priority features to help users organize tasks by course and due date.
- **File Organizer Script:**
 - Wrote a small automation script that sorts downloaded files into folders based on file type and naming rules.

SKILLS

- **Programming Languages:** Language 1, Language 2, Language 3
- **Libraries / Frameworks:** Library 1, Library 2, Library 3
- **Tools:** Tool 1, Tool 2, Tool 3
- **Languages:** Language A, Language B
